SAHASRA LIS GenX ERP is an end-to-end Laboratory Information System and diagnostic business management platform for pathology labs, radiology centres, hospital laboratories, reference labs and multi-branch diagnostic networks.

One Platform. Every Laboratory Process. Complete Business Control.

Manage the workflow from registration and sample collection through analyser integration, authentication, delivery, billing and analytics.

Complete Connectivity
Patients • B2B Partners • Doctors • Labs • Machines • Logistics • Finance • Inventory • Management

Automation Advantage
Auto result capture • Faster authentication • Smart delivery • Critical alerts • Automated invoicing

Management Control
Revenue dashboards • Outstanding analysis • TAT • Workload • Stock • Reagent • Expiry visibility

Complete Solution Portfolio

Sahasra LIS GenX combines clinical laboratory workflow, business operations, mobile services and enterprise management in one integrated diagnostic platform.

Complete LIS Application
Registration, sample collection, accessioning, worklists, result entry, validation, authentication and report generation.

Patient Portal
Secure patient access to reports, history and digital services.

B2B Partner Web Portal
Registrations, billing, reports, partner pricing and business tracking.

B2B Android / iOS App
Mobile access for partner operations and report downloads.

Logistics & Sample Pickup
Pickup planning, tracking and collection-centre coordination.

WhatsApp Chatbots
Separate B2B and B2C chatbot workflows.

Payment Integration
Payment Gateway, UPI and swipe-device integration.

WhatsApp / SMS / Email
Automated alerts, report delivery and notifications.

Machine Integration
600+ analyser integration experience and automated result capture.

Third-Party Out-Lab
External laboratory workflow integration for referred tests.

Bulk Operations
Bulk registration, bulk billing and bulk report downloads.

Doctor Authentication App
Mobile report review and authentication.

Lab & Radiology Dashboards
Pending, workload, TAT and report-status visibility.

MD Dashboard App
Android/iOS revenue, TAT and management analytics.

Machine-Level Auto Authentication
Rule-driven auto authentication services.

Auto B2B Invoice Generation
Automated partner billing and invoices.

Co-Branded Reports
Partner-wise customized report branding and output.

Stores / Reagents / Inventory
Stock, reagent and expiry management.

CMS & Health Packages
Service-package and preventive-health package management.

Multi-Branch Centralized Management
Central administration for branches and collection centres.
